

Class for fast learners.

Yah learners. All that stands between you and the take of your dreams is a little less than 50cc less.

Our designers were sixteen once. That's why they've busted themselves to build you a range of 50cc bikes with a bit of real ranch. Bikes with the same class, guts and good looks as their bigger brothers.

The DT 50MX is the perfect appetizer on our world-beating motorcycle roster. Note the torque induction, Mono-shock suspension, five-speed box, and trail bars.

The FS1S tells it all about the Yamaha 50 machines. Full body bars, megaphone muffler and dual seat 'H' grab-bar make the FS the eye-catchingest little number this side of the Rockies.

And if you've got eyes for an RD 250LC, just run them over the RD 50MX with its gold wheels, sleek fuel tank, front disc, and Mono-shock suspension.

These, then, are our cheap new steeders. Choose one. Ride it for twelve months and the odds are, you'll ride a Yamaha learner.
